

**LET COEJLSC HELP YOUR SYNAGOGUE WORK TOWARDS BECOMING A  
*GREEN SANCTUARY***

Create a “Green Team”: Form a committee that will organize and facilitate green practices in your synagogue. CoejlSC will provide your Green Team with ongoing assistance and education.

Implement Recycling Programs: Recycle within your institution (most of the time at no additional cost to you) and launch a campaign to encourage congregants to recycle in their own homes and businesses. CoejlSC will connect you with the recycling companies and even take your inkjet and toner cartridges to be recycled.

Green your building: Retrofit your facility to establish energy efficiency and water conservation. CoejlSC will bring the right experts to you so that you can maintain your facility as a Green Synagogue while allowing your institution to be much more cost effective.

Havdalah Hikes: Highlight the connection between Jewish values and environmental responsibility. CoejlSC will come to your synagogue and lead a Havdalah Hike where members can create a spiritual experience through Judaism and nature.

Tree Plantings: Let CoejlSC organize a tree planting at your synagogue. Jewish teachings have always emphasized the importance of planting trees.

Educate: Jewish texts reveal the importance of caring for creation so that we may create a better future for our children and grandchildren. CoejlSC will speak at functions and meetings (as well as provide educational material) in order to draw the connection between Judaism and our responsibility to protect the environment.
